PROFESSIONAL SUMMARY

Python Full-Stack Developer with 1+ year of professional experience building end-to-end web applications, from backend services and REST APIs in Python (FastAPI, Django) to responsive React.js frontends. Experienced with micro frontends, JWT-based authentication, AI-powered applications, and AWS. Delivered client-facing projects including a trade matching engine, a CMMS platform, and multiple AI/Agentic AI proofs of concept.

WORK EXPERIENCE

AceNet Consulting Pvt Ltd *Pune, Maharashtra*

Software Engineer (08/2025 - Present)

- Developed backend services and REST APIs using Python (FastAPI) to support internal tools and client-facing features.
- Built reusable React.js components for the E2O (Thejo) client project, improving UI/UX modularity and consistency across the application.
- Resolved critical client-raised production tickets on the BG application, working directly with the client team to troubleshoot and close issues quickly.
- Implemented complex Microsoft SQL Server schema changes to support new business requirements without disrupting production.
- Developed internal Proofs of Concept (TME, CMMS, AI applications) for business workflow optimization, taking each from design through working demo.

Full Stack Developer Intern (05/2025 - 08/2025)

- Conducted API testing using Swagger and Postman across multiple services, and optimized SQL queries to improve backend performance.

UV Tech

IT Trainer (01/2025 - 05/2025)

- Trained learners in Python full-stack development (FastAPI/Django, React.js, REST APIs) with structured, hands-on sessions.

KEY PROJECTS (OFFICE)

Micro Frontend Architecture (MFE)

- Developed a host application integrating multiple micro frontends, improving application load time and scalability by ~30%.

Computerized Maintenance Management System (CMMS) & Agentic AI

- Designed and built the complete UI for a CMMS proof of concept covering preventive-maintenance workflows, with role-based functionality for managers and technicians. Extended it with an autonomous Agentic AI assistant (built using Agno/Phidata) integrated with internal APIs to fetch and synthesize real-time machine telemetry and maintenance backlogs.

Trade Matching Engine (TME)

- Designed a high-concurrency backend system in Python (FastAPI), paired with a React.js frontend, to match multi-party trades, automatically calculating settlement amounts and flagging mismatches.

AI-Based Applications (AI Chatbot, AI VKYC, AI Timesheet)

- Built a secure Video KYC system with AWS Rekognition and an AI-driven timesheet processor using AWS Textract and Amazon Bedrock to extract and validate attendance records.

PERSONAL PROJECTS

AI Interview Screening Platform — speech-interview-frontend.vercel.app

- Built and deployed an AI-powered interview screening app that conducts and evaluates speech-based mock interviews in real time using speech-to-text and LLM-driven feedback.

Pizza Ordering Platform (E-Commerce) — pizza-ordering-platform-6gd3.onrender.com

- Built and deployed a full-stack e-commerce ordering platform with cart, checkout, and order management flows.

AI Travel Planning Agent

- Built an AI agent that generates personalized travel itineraries based on user preferences, budget, and destination using LLM-based planning.

SKILLS

Languages & Frameworks: Python, JavaScript, Django, FastAPI, React.js, Redux Toolkit, Tailwind CSS, MUI, Micro Frontends, REST APIs
Cloud, DevOps & Databases: AWS, Azure, Git, GitHub, GitHub Actions (CI/CD), PostgreSQL, Microsoft SQL Server, MySQL, SQLite
AI Technologies: Agno, Agentic AI, RAG, LangChain, LLMs, OpenAI API, Prompt Engineering

EDUCATION

B.Tech in Computer Science and Engineering, Government Engineering College, Ajmer *08/2019 - 11/2023 | CGPA: 7.5*

Python Full-Stack Development Training, ITVedant *01/2024 - 01/2025*

Achievements: Quarterly Performance Award, AceNet | **Languages:** English, Hindi (Native/Bilingual)
